# Version 4 Returned Fields

The API returns data as json by default, but you can also choose to return data in pson, xml and a 'debug' format. Simply specify the format as the file extension in the url.

| | |
|---|---|
| json | restapi.alchemer.com/v4/survey/123456/surveypage/1.**json** |
| pson | restapi.alchemer.com/v4/survey/123456/surveypage/1.**pson** |
| xml | restapi.alchemer.com/v4/survey/123456/surveypage/1.**xml** |
| debug | restapi.alchemer.com/v4/survey/123456/surveypage/1.**debug** |
| jsonp* | restapi.alchemer.com/v4/survey/123456/surveypage/1.**jsonp** |

*We recommend creating a new API Key and restricting this API Key to GET access when using jsonp.*

The API returns various fields for each object. The returned fields for many objects are straightforward. For more complex objects, we provide a list of the returned fields; check out the below linked documents for more info.

- SurveyQuestion Returned Fields
- SurveyOption Returned Fields
- Survey Returned Fields
- SurveyResponse Returned Fields
- SurveyResponse Return Per Question Type
