Update User's Team Properties

Updates role and team manager settings for teams where the user is already a member.

Endpoint

POST v5/accountuser/{user_id}/teams

Requires authentication

Path Parameters

The user whose team memberships will be updated.

user_id

string

required

The user ID of the subject user.

Body

The request body is an array of team-property update objects.

team_id

string

required

The team ID to update for this user.

is_team_manager

boolean

Whether the user should be set as the team manager.

role_id

string

Role ID to assign for this user on the team.

Response

Returns overall status and per-team update results.

result_ok

boolean

Whether the overall request succeeded.

code
integer

Status code. `200` = success, `400` = error.

message
string

A message describing the result.

data
array

Per-team update results.

+ ▶ child attributes

Examples

REQUEST (CURL)

```
curl -X POST "https://api.alchemer.com/v5/accountuser/1/teams?api_token=YOUR_API_T
OKEN&api_token_secret=YOUR_API_TOKEN_SECRET" \
  -H "Content-Type: application/json" \
  -d '{
    "teams": [
      {
        "team_id": "12345",
        "is_team_manager": true,
        "role_id": "3"
      }
    ]
  }'
```

SUCCESS RESPONSE

```json
{
  "result_ok": true,
  "code": 200,
  "message": "Updated user on 1 teams.",
  "data": [
    {
      "team_id": "12345",
      "result_ok": true,
      "code": 200,
      "message": "Updated user on team."
    }
  ]
}
```

ERROR RESPONSE

```json
{
  "result_ok": false,
  "code": 400,
  "message": "Failed to update all teams for user. See data for details.",
  "data": [
    {
      "team_id": "12345",
      "result_ok": false,
      "code": 400,
      "message": "Failed to update team for user. User is not a member of team id 12345."
    }
  ]
}
```
