

Delete User from Teams

Removes the subject user from one or more specified teams.

Endpoint

DELETE v5/accountuser/{user_id}/teams

Requires authentication

Path Parameters

Identifies which user will be removed from the specified teams.

user_id

string

required

The user ID of the user that is the subject of this call.

Body

An array of team IDs indicating which teams to remove the user from.

team_ids

array

required

Array of team ID strings identifying the teams to remove the user from.

Response

Returns an overall success/fail status plus per-team result objects.

result_ok

boolean

Whether the overall request was successful.

code

integer

Status code. `200` = success, `400` = error.

message

string

A message describing the result.

data

array

Array of result status objects for each team processed.

- ▼ child attributes

team_id

string

The ID of the team processed.

result_ok

boolean

Whether the operation succeeded for this team.

code

integer

Status code for this team. `200` = success, `400` = error.

message

string

A message with details about this team's result.

Examples

REQUEST (CURL)

```
curl -X PUT "https://api.alchemer.com/v5/accountuser/YOUR_USER_ID/teams?api_token=YOUR_API_TOKEN&api_token_secret=YOUR_API_TOKEN_SECRET" \  
-H "Content-Type: application/json" \  
-d '{  
  "team_ids": [  
    "1234"  
  ]  
'
```
