

Update Users' Team Properties

Updates role and team manager settings for one or more users already on the specified team.

Endpoint

POST v5/accountteams/{team_id}/users

Requires authentication

Path Parameters

The team whose user memberships will be updated.

team_id

string

required

The ID of the team on which user properties will be updated.

Body

An array of user-team update objects, one per user to be updated. At least one of

`is_team_manager` or `role_id` is required per object.

user_id

string

required

The ID of the user to update on this team.

role_id

string

The role ID to assign to the user on this team.

is_team_manager

boolean

Whether the user should be set as a team manager.

Response

Returns overall status and per-user result objects in the `data` array.

result_ok

boolean

Whether the overall request succeeded.

code

integer

Status code. `200` = success, `400` = error.

message

string

A message describing the result.

data

array

An array of per-user result objects.

- ▼ child attributes

user_id

string

The ID of the user processed.

result_ok

boolean

Whether the operation succeeded for this user.

code

integer

Status code for this user. `200` = success, `400` = error.

message

string

A message with details about this user's result.

Examples

REQUEST (CURL)

```
curl -X POST "https://api.alchemer.com/v5/accountteams/YOUR_TEAM_ID/users?api_token
=YOUR_API_TOKEN&api_token_secret=YOUR_API_TOKEN_SECRET" \
-H "Content-Type: application/json" \
-d '{
  "users": [
    {
      "user_id": "YOUR_USER_ID",
      "is_team_manager": false,
      "role_id": "2"
    }
  ]
}'
```
