

# Get Account

Returns details about your Alchemer account. This is the only API operation available for the Account object.

## Endpoint

**GET** v5/account

Requires authentication

## Path Parameters

None

## Query Parameters

All query parameters are optional.

### **api\_customer\_id**

*string*

For resellers only. Pass a subaccount's customer ID to retrieve details for that account instead of the authenticated account.

## Response

Returns a status flag and an account details object.

### **result\_ok**

*boolean*

Whether the request succeeded.

### **data**

*object*

The account details object.

+ ▶ child attributes

## Examples

NOTE GET requests are cached for 60 seconds. Repeated identical requests within that window

will return cached results.

#### REQUEST (CURL)

```
curl -X GET "https://api.alchemer.com/v5/account?api_token=YOUR_API_TOKEN&api_token_secret=YOUR_API_TOKEN_SECRET"
```
