Create Account User

Creates a new user in your account.

Endpoint

PUT v5/accountuser

Requires authentication.

Path Parameters

None

Query Parameters

email

string

required

The email address for the new user.

username

string

The display name for the new user.

team

integer

The ID of a team to add the user to.

defaultteam

integer

The ID of the team to set as the user's default team.

admin

integer

Whether to grant account administrator privileges. Accepted values: 1 (admin), 0 (standard user).

phone_support

integer

Whether to enable phone support access. Accepted values: `1` (enabled), `0` (disabled).

license

string

The license type to assign to the user. Accepted values: `Full Access` , `Professional` , `Collaborator` , `Stakeholder` .

create_access_token

boolean

Whether to generate an API access token for the new user. Only allowed when using OAuth authentication. Accepted value: `true` .

userdata

object

Custom user data fields to set on the new user. Each key is the column name of the custom field.

- ▼ child attributes

  ### column_name

  string

  The value to set for the named custom field. Example: `userdata[department]=sales` .

Response

Returns the newly created account user object.

result_ok

boolean

Whether the request succeeded.

data

object

The newly created account user object.

- ▼ child attributes

  ### id

  string

  The unique ID of the newly created user.

username

string

The user's display name.

email

string

The user's email address.

status

string

The user's account status. Possible values: `Active` , `Disabled` .
