Get Domain

Returns information about a specific custom domain in your account.

Endpoint

> **GET** v5/domain/{domain_id}

Requires authentication

Path Parameters

The domain to retrieve.

> **domain_id**
>
> *string*
>
> *required*
>
> The ID of the domain to retrieve.

Query Parameters

This endpoint does not accept additional query parameters beyond authentication credentials.

> None

Response

Returns a single domain record nested under its domain ID key.

> **result_ok**
>
> *boolean*
>
> Whether the request succeeded.

> **data**
>
> *object*
>
> A keyed object containing a single domain record, where the key is the domain ID.
>
> - ▼ child attributes
>
>> **id**
>>
>> *integer*
>>
>> The unique ID of the domain.

customerID

string

The account (customer) ID this domain belongs to.

type

string

The domain type. Possible values: `Private` , `Subdomain` .

domain

string

The domain URL (e.g. `surveys.mycompany.com`).

redirect

string

The survey-not-found redirect URL. Empty string if not configured. Applies to Private domains only.

eStatus

string

The domain status (e.g. `Active`).

created

string

Timestamp when the domain was created.

Examples

> NOTE GET requests are cached for 60 seconds. Repeated identical requests within that window will return cached results.

REQUEST (CURL)

```
curl -X GET "https://api.alchemer.com/v5/domain/YOUR_DOMAIN_ID?api_token=YOUR_API_TOKEN&api_token_secret=YOUR_API_TOKEN_SECRET"
```
