List Surveys

Returns a paginated list of all surveys in the authenticated account.

Endpoint

GET v5/survey

Requires authentication

Path Parameters

None

Query Parameters

None

Response

Returns a paginated array of survey objects belonging to the authenticated account.

result_ok

boolean

Whether the request succeeded.

total_count

integer

Total number of surveys in the account.

page

integer

Current page index of the result set.

total_pages

integer

Total number of available result pages.

results_per_page

integer

Number of results returned per page.

data
array

Array of survey objects.

\- ▼ child attributes

id
string

The unique ID of the survey.

team
string

The ID of the team that owns the survey.

type
string

The survey type. Example values: `Standard Survey` , `QuestionLibrary` .

status
string

The current status of the survey. Example values: `Launched` , `Closed` .

created_on
string

Timestamp when the survey was created.

modified_on
string

Timestamp when the survey was last modified.

title
string

The title of the survey.

statistics
object | null

Response count totals keyed by status. Returns `null` for survey types that do not collect responses (e.g. `QuestionLibrary`).

- ▼ child attributes

Complete
integer

Number of completed responses. Only present if the count is greater than zero.

Partial
integer

Number of partial responses. Only present if the count is greater than zero.

Deleted
integer

Number of deleted responses. Only present if the count is greater than zero.

Disqualified
integer

Number of disqualified responses. Only present if the count is greater than zero.

links
object

Direct URLs for common actions on the survey.

- ▼ child attributes

edit
string

URL to open the survey in the Alchemer editor.

publish
string

URL to open the survey's distribution settings.

default
string

The default public URL for the survey.

Examples

NOTE GET requests are cached for 60 seconds. Repeated identical requests within that window

> will return cached results.

```
curl -X GET "https://api.alchemer.com/v5/survey?api_token=YOUR_API_TOKEN&api_token
_secret=YOUR_API_TOKEN_SECRET"
```
