

Update Survey Page

Updates a specified page in a survey. Any combination of title, description, and properties may be changed in a single call.

Endpoint

POST v5/survey/{survey_id}/surveypage/{page_id}

Requires authentication

Path Parameters

Identifies the survey and specific page to update.

survey_id

string

required

The ID of the survey containing the page.

page_id

string

required

The ID of the page to update.

Query Parameters

All query parameters are optional. Include only the fields you want to change.

title

string

The updated title of the page.

description

string

The updated description text for the page.

properties

object

Configuration properties to update on the page.

- ▼ child attributes

hidden

boolean

Set to `true` to hide the page from respondents.

piped_from

string

The ID of the question whose answer should be piped onto this page.

Response

Returns the updated survey page object.

result_ok

boolean

Whether the request succeeded.

data

object

The updated survey page object. See Get Survey Page for the full list of response fields.

- ▼ child attributes

id

string

The unique ID of the page.

title

string

The updated title of the page.

description

string

The updated description text of the page.

properties

object

Configuration properties reflecting the current state of the page.

- ▼ child attributes

hidden

boolean

Whether the page is hidden from respondents.

pipled_from

string

The ID of the question whose answer is piped onto this page.
